

Education provides children and their families with valuable skills to build a better future for themselves and their communities.

Learning enables children to imagine a future full of possibilities.

When children's worlds are turned upside down, schools and teachers bring the inspiration necessary to rebuild lives.

Quality education helps foster a peaceful, resilient and sustainable society.

Education is aspiration.

In countries that have emerged from conflict or natural disasters, education restores civic confidence and can be one of the first dividends of peace. It signals prospects for a better future where children are given the opportunity to learn and develop to their full potential. Education is a fundamental human right that protects children from harm. This right is never more challenged, or more needed, than in times of crisis. To learn more, please visit:
